

An Introduction to **Lead-Safe Work Practices** In Your Home

**Saturday
March 30
10am-1pm**

**Oakland Tool Lending Library,
5205 Telegraph Ave., Oakland, CA 94609**

Are you planning DIY renovation projects in your vintage home? Houses built before 1978 are likely to contain lead-based paint, and extra care must be taken to safely work in these environments. Join us for an introduction to the tools, respirators, and lead-safe work practices that DIY-ers need to safely update their homes.

The class will be led by Peter Belanger, an EPA-certified renovator and CDPH State Certified Project Designer and Project Monitor who has been presenting lead trainings for more than 15 years. He recently retired from the Alameda County Healthy Homes Department, and also teaches courses in residential plumbing and electrical work at Laney College.

Workshop is limited to 25 on a first-come, first-served basis. No need to pre-register. Questions: (510) 597-5089
